# iPhoneApp01: Intro to iPhone App Development: Course Schedule

## 1 Day Course Schedule

Requirements to join the Apple Developer Program. Registration. Understanding different levels.

### Installing The SDK

Installation process of the Apple Software Development Kit.

### Creating Content for your Application

Use templates and web design techniques to create content for your application.

### Testing Content in iPhone Simulator

Using the tools within the SDK you will test to ensure your content displays accurately.

### Exploring the SDK

iPhone simulator and Interface Builder and XCode are the tools to familiarise yourself with to create applications

### Importing Content

Import your content into XCode and interact with it.

### Code Snippets

Use pre written code to create interactions within your application, design the interface and start testing your application.

### Create an Icon

Instead of using the default white square you will create your own unique App icon for your home screen.

### Building Testing and Distributing

Final build and test of your application. This section will also highlight the steps to take to submit your application via iTunes connect as well as some common pitfalls and pre conceptions.
